

Betuwe Route Sliedrecht - Gorinchem section

Client	Projectorganisatie Betuweroute
Client website	www.betuweroute.nl
Country	The Netherlands
Location	tracé Sliedrecht -Gorinchem
Delivery date	01 11 2003
Size	Over 1 million EUR

Strukton Rail has done engineering and constructed track on the Sliedrecht-Gorinchem section along the Betuwe Route. The construction of the Betuwe Rout was the largest infrastructure project in the Netherlands, which in terms of scale can only be compared with the Deltawerken project. From 2007 onwards, the Betuwe route will carry freight traffic between the port of Rotterdam and the German hinterland.

Activities

For the Sliedrecht – Gorinchem section, Strukton Rail carried out the following work:

- Engineering

Design & Construct for track and rail work, structures, foundation for catenary gantries and noise abatement screens.

- Rail work

Laying of approx. 22,000 m complete track including various points.
