

Construction of fast tram line Amstelveen

Client	Gemeentelijk Vervoer Bedrijf Amsterdam
Client website	www.gvb.nl
Country	The Netherlands
Location	Amsterdam CS - Westwijk te Amstelveen
Delivery date	04 03 2004
Size	Over 1 million EUR

Strukton Rail constructed the track and catenary and installed the passenger information system for the extension of the fast tram line 51 to the newly built 'Westwijk' district in the municipality of Amstelveen.

Amstelveen – Westwijk tram

To improve access to the Westwijk district in Amstelveen, and to offer a direct transfer for passengers from and to Aalsmeer and Schiphol, a tram line was laid to extend the existing fast tram between Amstelveen Poortwachter and Amstelveen Westwijk.

Activities
