

Telecommunication Swalmen stop

Client	Imtech Infratechniek
Client website	Imtech Infra
Country	The Netherlands
Location	Swalmen
Delivery date	01 06 2004
Size	50.000 to 250.000 EUR

In the framework of the project at Swalmen for the A73 Motorway Track Relocation, a new stop was built. For this stop, Strukton Rail supplied and installed telecommunication installations.

Activities

- Establishing intercommunication possibilities (including network cabling) for various systems
- The supply, installation and adjustment of the PA installation
- Placing and installing loudspeaker columns
- Altering the software at the Maastricht main control post
- Placing and installing clocks
- Placing the LSA+ distributor and coil rack on the wall
- Placing and installing overvoltages in the relay room
- Providing telephone and connections in all technical rooms
- Relocating the existing ZMX subpost to the new telecom room
